

## How To Have a Faster Download Experience

- ▶ CDN produces this advantage
- ▶ Therefore, first download from the signed URL is not fast, unfortunately

## How To Have a Faster Download Experience

- ▶ CDN produces this advantage
- ▶ Therefore, first download from the signed URL is not fast, unfortunately
- ▶ Download your artifact first on CI right after deployment

```
artifact_url=$(<response> | jq -r ".results.file")  
curl -SLs $artifact_url >/dev/null
```

- ▶ Note that the URL will be expired, so this tip does not work if new URLs are published
