Semi-Interactive Flow PR-Aware

Semi-Interactive Flow – orta/danger-junit

- ▶ Comment failures in JUnit style reports

The screenshot shows a GitHub comment from the bot 'jmatsu-bot' dated Jan 11. The comment contains a JUnit-style test report. At the top, it says '2 Errors'. Below this, there are two error messages, each preceded by a red prohibition icon. The first message states 'Tests have failed, see below for more information.' The second message states 'Please check the artifacts of CircleCI. Test reports would be available there.' Below the error messages, the section 'Tests:' is followed by a table with three columns: 'Name', 'Classname', and 'Ti'. The table contains one row with the values 'loadingState', 'io.github.droidkaigi.confsched2019.session.ui.store.SessionContentsStoreTest', and '0:'. At the bottom right of the comment, it says 'Generated by' followed by a red prohibition icon and the word 'Danger'.
