

Stable Realized by Flexible

- ▶ So, how should failures be propagated?
 - ▶ Lints → Accept failures
 - ▶ Reports
 - ▶ Testing → Never accept failures
 - ▶ Assembling
 - ▶ Deployment → Depends on branches

Stable Realized by Flexible – Examples

- ▶ Separate assembling and testing into independent jobs
 - ▶ It's also a part of structuring deployment pipeline
- ▶ Use `*continue*` from gradle options
 - ▶ `./gradlew lintDebug testDebugUnitTest ktlint --continue --offline`
- ▶ Use `retry-command` to execute unstable commands
 - ▶ To download dependencies in DroidKaigi app
