Semi-Interactive Flow – orta/danger-junit

- ▶ Comment failures in JUnit style reports

The screenshot shows a GitHub comment from the bot 'jmatsu-bot' dated Jan 11. The comment header includes a collaborator button and a smiley face icon. The main content is a JUnit-style test report. It starts with a table titled '2 Errors' containing two rows, each with a red prohibition icon and a message. Below this is a 'Tests:' section with a table listing test results. The table has three columns: 'Name', 'Classname', and 'Ti'. One test is listed: 'loadingState' from the class 'io.github.droidkaigi.confsched2019.session.ui.store.SessionContentsStoreTest' with a 'Ti' value of '0.'. At the bottom right, it says 'Generated by' followed by a red prohibition icon and the word 'Danger'.
