

## Stable Realized by Flexible – Examples

- ▶ Separate assembling and testing into independent jobs
  - ▶ It's also a part of structuring deployment pipeline
- ▶ Use `*continue*` from gradle options
  - ▶ `./gradlew lintDebug testDebugUnitTest ktlint --continue --offline`
- ▶ Use `retry-command` to execute unstable commands
  - ▶ To download dependencies in DroidKaigi app

## Objectives/Solutions

- ▶ Be stable
- ▶ Be environment agnostic
- ▶ Provide semi-interactive flow
- ▶ Give useful deployment pipeline experiences.
