Sorry, your **session submission** has been declined.

We are engineers so we should go with lazy methods.

In this talk, I will explain

- What can be semi- and/or fully- automated
- How to automated stuff like
- Introduce Danger
- Report differences between two apk files
- Import design assets to vector drawables or png files
- License files
- Proguard rules
- Report results of static analysis

DECLINED ~~SUCCESSFULLY~~

# What I Wanted Talk About

- ▶ Automate ~~everything~~ many things
  - ▶ Report tests, stats
  - ▶ Import SVG assets w/ optim.
  - ▶ Import any other materials
- ▶ Keyword:
  - ▶ Be lazy, mistake-less development
