## Stable Realized by Flexible

- So, how should failures be propagated?
  - Lints

Accept failures

- Reports
- Testing

- Assembling
- Deployment

Depends on branches

## Stable Realized by Flexible - Examples

- Separate assembling and testing into independent jobs
  - It's also a part of structuring deployment pipeline
- Use \*continue\* from gradle options
  - ./gradlew lintDebug testDebugUnitTest ktlint --continue --offline
- Use retry-command to execute unstable commands
  - To download dependencies in DroidKaigi app
