Stable Realized by Flexible - Examples

- Separate assembling and testing into independent jobs
 - It's also a part of structuring deployment pipeline
- Use *continue* from gradle options
 - ./gradlew lintDebug testDebugUnitTest ktlint --continue --offline
- Use retry-command to execute unstable commands
 - To download dependencies in DroidKaigi app

Objectives/Solutions

- Be stable
- Be environment agnostic
- Provide semi-interactive flow
- Give useful deployment pipeline experiences.
