Sorry, your session submission has been declined.

We are engineers so we should go with lazy methods.

In this talk, I will explain

- What can be semi- and/or fully- automated
- How to automated stuff like
- Introduce Danger
- Report differences between two apk files
- Import design assets to vector drawables or png files
- License files
- Proguard rules
- Report results of static analysis

## What I Wanted Talk About

- Automate everything many things
  - Report tests, stats
  - Import SVG assets w/ optim.
  - Import any other materials
- Keyword:
  - Be lazy, mistake-less development
