Before/After Code Testing?

▸ Testing is an important stage of dev. process

▸ There are many technique for testing and we are continuing to look for better practices

▸ However,

  ▸ It's <u>a part</u> of the whole process, and *code* is just one of testing factors

  ▸ Things around code testing are also important, and should be comfortable

What I Will Talk About

▸ Motivation

▸ **Definition of *comfortable***

▸ Tips to support your testing

    ▸ How to organize non-fragile CI

    ▸ Save/load intermediate results of the current/previous build

    ▸ Get advantages of DeployGate
