Stable Realized by Flexible

▸ So, how is the failure propagation?

▸ Lints

➡ Accept failures

▸ Reports

▸ Testing

➡ Never accept failures

▸ Assembling

▸ Deployment ➡ Depends on branches

Stable Realized by Flexible – Examples

▸ Separate assembling and testing into independent jobs

  ▸ It's also a part of structuring deployment pipeline

▸ Use *continue* from gradle options

  ▸ ./gradlew lintDebug testDebugUnitTest ktlint --continue --offline

▸ Use retry-command to execute unstable commands

  ▸ To download dependencies in DroidKaigi app
