Stable Realized by Flexible

Stable Realized by Flexible

▸ Let's categorize commands by their aspects

▸ Lints

▸ Reports

▸ Testing

▸ Assembling

▸ Deployment

Stable Realized by Flexible

▸ ~~No failure is required anyway!~~

▸ Flexible with failures.

  ▸ What's non-flexible with failures?

    ▸ Fail CI anyway if any task fails like `set -e` in the shell.

    ▸ CI Steps are sequential, so...

  ▸ Make CI/CD fail with depending on the commands.
